Projects

1. URL Shortener :

- Converts lengthy web addresses into short, easy-to-share links.
- The shortened URL redirects users to the original, full-length URI.
- Uses the shortid library to generate unique identifiers for each shortened link.
- Built using MongoDB, Express, React, and Node.js.
- Makes it easier to share and manage URLs.

2. Ecommerce Cart Project:

- Built to understand Redux, focusing on state management in a real-world scenario.
- Fetched product data from a dummy API and displayed it within the application.
- Utilized Redux to manage the cart state, allowing users to add products to the cart efficiently.
